VISUALIZATION

Project

- **Option 1:**

  1. Select any real world data source of your choice
  2. Derive insights on the data using suitable visualization and interaction techniques

- **Option 2:**

  1. Develop and implement a novel visualization/interaction/layout technique.
  2. Showcase its usefulness with a dataset.

- **Option 3:**

  1 Implement a Visual Analytics system (if reqd augment an existing system).

  2 Showcase its usefulness with a dataset.

- The project group size can be 1-4. (As project group size increases more is expected)

GRADING

TYPE	PERCENTAGE
▪ Problem significance	4
▪ Effort	6
▪ Results	6
▪ Aesthetics	3
▪ Presentation	3
▪ Demo	3
▪ TOTAL	25

Project Milestones

- **Project Proposal (5-7 slides)**
  - What is the problem you are solving?
  - What data will you use (how will you get it)?
  - What work do you plan to do the project?
  - Which algorithms/techniques/models you plan to use/develop?
  - What do you expect to submit/accomplish by the end of the semester?
  - Literature Survey – All the relevant prior work that has been done with respect to your chosen problem.
  - **In-class presentation:** After Mid-term exam

- **Final Report (20-25 slides)**
  - Introduction/Motivation/Problem Definition
  - Related Work
  - Model/Algorithm/Method
  - Results and Findings
  - Conclusion and Future Work
  - **In-class presentation:** After Final exam
